-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "60" has been used to designate both bread ring and clipper. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Urban et al. U.S. Patent 5,024,041.

Urban et al. Teach a process for filling tubular casings comprising a filling horn adapted to receive extruded food products and having an outside diameter on which a tubular

casing 26 is positioned. A shir housing having a diameter greater than said outside diameter of said filling horn and located coaxially to said filling horn and a netting tube 27 releasably attachable to said shir housing. Regarding claims 3 and 10, the process forms a product which is edible.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Urban et al. U.S. Patent 5,024,041.

Urban et al does not discuss the use of a clipper in combination with the device.

However, in regards to claims 2 and 9, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the apparatus of Urban et al with a clipper, in order to form individual links of sausages instead of a continuous strand.

Claims 4-7 and 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Urban et al U.S. Patent 5,024,041 in view of Underwood U.S. Patent 5,135,770.

Urban et al do not discuss the use of flavoring or a dyed casing. Underwood teaches food casings having a flavoring and dyed quality. Regarding the claims, it would have been obvious to a person of ordinary skill in the art at the time the invention was made

to modify the apparatus of Urban et al with a flavored casing, in view of Underwood, in order to provide additional flavoring to the edible product.

Conclusion

Summary: Claims 1-14 are rejected.
